***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1, 3, 5, 7 to 10, 13, 14, 16 to 18, 20 to 23 and 56 to 59, drawn to semiconductor device, classified in Class 257, Subclass 758;
  - II. Claims 24 to 54 and 60 to 62, drawn to a process for making a semiconductor device, classified in Class 438, Subclass 14+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case unpatentability of the Group I invention would not necessarily imply unpatentability of the Group II invention, since the Group I invention could be made without using a chemically patterned surface (e.g. a mechanically patterned surface; Claim 24).
3. Because these inventions are distinct for the reasons given above and, as shown by the above different classifications, the fields of search are not co-

extensive and separate examination would be required, restriction for examination purposes as indicated is proper.

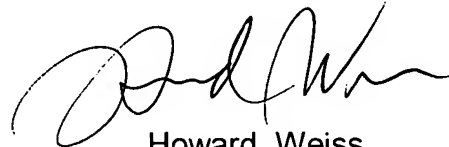

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
